About

I am a natural problem solver, powered by my wish to craft anything from scratch, curious to discover what happens behind every technology. Since I was young, I've had a love for creating, testing, and improving things Wow macros. Video games were always a passion, helping me develop skills such as proactivity, communication, and observation. Do get in touch so we can have a chat and develop some clever solutions.

Skills

• Coding: JavaScript | HTML | CSS | Sass | Bootstrap | ReactJS | NodeJS | Express | MongoDB | Mongoose | PostgreSQL | Sequelize Typescript | Git | GitHub | C | Java | Full Stack | Frontend | Backend
